D4C Cartridge High pressure pump.....	102
Shaft couplings for obsolete pumps	104
Shaft seals for withdrawn pumps.....	106

Section A

General information

**Please be informed that from
2017.01.01 all parts no. starts
with 901**

Following information are required to handle your order
in a proper way.

Required information:

Always:

- Your order number and date.
- Delivery address (if not standard).
- Required delivery date from IMO AB.
- If part delivery is accepted.
- Pricing (if not standard).
- Payment terms (if not standard).
- Delivery terms (if not standard).
- Value for customs clearance if delivery direct to your customer.

**IF WE HAVE MADE AN OFFER, PLEASE ALWAYS
REFER TO THIS OFFER.**

Optional:

- Your contact person.
- Your customers order number and date.
- Name of your customer.

Content:

Please specify the complete designation and serial number of the pump that you require spares for, i.e. "ACF 110N4 IRBO A020 s/n 345678". Please specify required spares with part number and quantity.

It is an advantage if you also note item number and/or the denomination of the part enabling easier control of correct part number.

Price and discount are only required if they deviate from our valid List price and your normal discount.
If you order complete pumps or pump elements do not forget to note if any certificates are required.

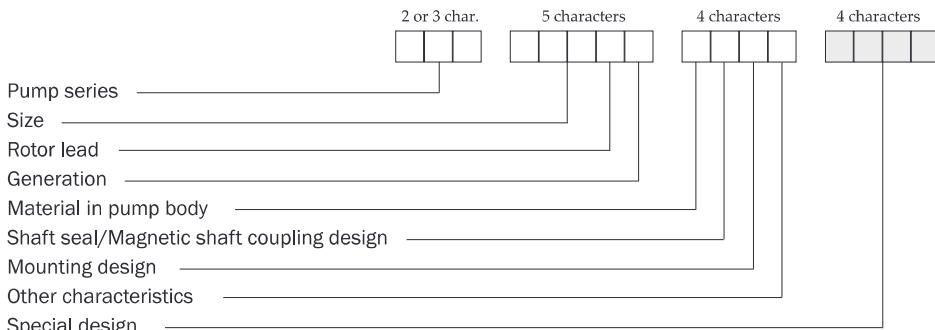

Instruction manuals for standard products:

Please visit our website: www.imo.se

Section B

Lists and tables

Explanation to the pump designation codes and serial numbers

Pump series

Designation for pump family, for example ACE, D4, D6.

Size

Stands for pump size (power rotor outer diameter in mm).

Existing sizes: 015, 020, 025, 032, 038, 045, 052, 060, 070, 080, 090, 100, 110, 125, 140, 160, 180

Lead

B, L, J and K	-	Different low leads
N	-	Normal lead
G, P and H	-	Different high leads

Generation

Stands for state of revision of pump design.

Material in pump body

(for cartridge pumps the sleeve)

F	-	Fabricated body.
I	-	Cast iron body .
L	-	Aluminum.
N	-	Nodular cast iron.
S	-	Steel body (with bronze lining for D6).
X	-	Special design, to be stated with A-code.
Y	-	Surface treated cast iron.

Shaft seal/Magnetic coupling design

E	-	Excluded (not included in the pump).
R	-	Standard seal with elastomers in nitrile.
T	-	Shaft seal with carbide faces seal.
V	-	Standard seal with elastomers in viton.
X	-	Special design, to be specified with A-code.
Q	-	Pump xTx with SealGuard - pump obsolete.
H, J, K, L, M, N	-	Magnetic shaft coupling

NOTE!

The pump series, D4, E4 and D6, have until 1986 had an information about the mounting design in the third position of the series designation (D4F, D4V, D4T). From 1986 only two positions are to be mentioned in the pump series code for these pumps. All designations stated are valid for pumps only. Pump units (pump with motor and accessories) are normally handled without any special designation.

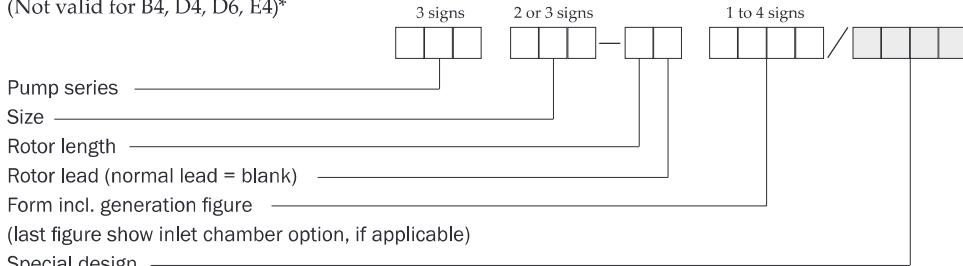

Serial numbers:

Individual serial numbers, 6 digits, on all pumps since 1987.

The smaller low pressure pumps earlier had a batch number as serial number showing year/week when the pumps were tested. Example 83-24. The smaller pumps received an individual serial number if they were sold with any certificate.

Old pump designation system (used until 1986)

(Not valid for B4, D4, D6, E4)*

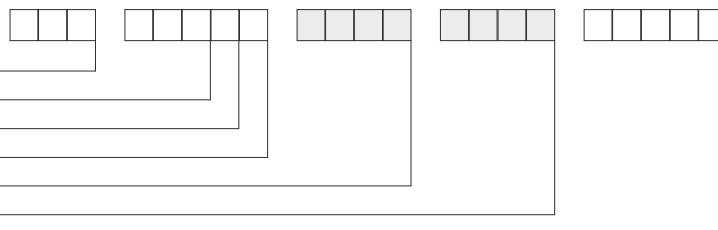

* For these pumps series are the new designation code valid less the material code + see the note above

Designations for spare parts

Spare parts book
September 2016

Pump series _____
 Pump size _____
 Pump lead _____
 Design revision number _____
 Design characteristics _____
 Special design (A-code) _____
 Item number _____

Pump series	Designation for pump family, for example ACE, D4																						
Pump size	Normally the largest pump size, for which this spare part can be used																						
Pump lead	"N"=normal lead in most cases. If rotors are included in the set, actual lead is stated.																						
Design revision no	The generation of the oldest pump design, for which this spare part can be used.																						
Design characteristics	The same 4-letter code as for the corresponding pump, indicating choice of material, shaft seal mounting design and "other". Used only if necessary to avoid ambiguity, otherwise omitted. Character specified only for those which are of interest, the others are specified with a 'x'. Example xVxx.																						
Special design (A-code)	The same A-code as for the pump, indicating deviation from standard. Used only if necessary to avoid ambiguity, otherwise omitted. For pumps delivered as pump elements or cartridge pump only the "A" in the A-code is changed to a "G".																						
Item number	<p>Single component, the digits refer to item number as shown on section drawing. First character:</p> <ul style="list-style-type: none"> D One level component, for example gasket D556 B Item including the D-component plus other item number <p>Example ACG generation 6 front cover item B501 consisting of:</p> <ul style="list-style-type: none"> D501 Front cover D502 Tension pin D502A plug D545 Tension pin <p>In those cases are the D-component only sold on the corresponding B level.</p> <p>G Spare part sets Spare part sets specified in this catalogue are:</p> <table border="0"> <tbody> <tr> <td>G011 Rotor set, CCW-rotation</td> <td>G053 Minor kit</td> </tr> <tr> <td>G012 Rotor set, CW-rotation</td> <td>G054 Major kit</td> </tr> <tr> <td>G015 Rebuilding set, incl rotor set G012</td> <td>G055 Joint kit (E4)</td> </tr> <tr> <td>G020 Sleeve element</td> <td>G057 Joint kit</td> </tr> <tr> <td>G031 Bearing element (E4, E4C)</td> <td>G070 Valve element</td> </tr> <tr> <td>G031 Front balancing cover (ABF)</td> <td>G082 Sealguard kit</td> </tr> <tr> <td>G034 Front cover</td> <td>G090 Pump element (LPQ,ABF,ABQ,ALG)</td> </tr> <tr> <td>G041 Rear bearing element</td> <td>G098 Magnetic coupling</td> </tr> <tr> <td>G050 Shaft seal</td> <td>G099 Complete shaft coupling</td> </tr> <tr> <td>G051 Sealing element</td> <td>G102 Pump element (E4, D4)</td> </tr> <tr> <td>G052 Mechanical seal</td> <td></td> </tr> </tbody> </table> <p>Old designation 11G=G011, 50G=G050, etc</p> <p>Second-fifth character Item number, example 401, 608A</p> <p>Example: ACG 045N7 G057 joint kit ACE 032N3 D501 front cover ACF 080N4 xVxx G053 minor kit ACG 070N6 B501 front cover</p>	G011 Rotor set, CCW-rotation	G053 Minor kit	G012 Rotor set, CW-rotation	G054 Major kit	G015 Rebuilding set, incl rotor set G012	G055 Joint kit (E4)	G020 Sleeve element	G057 Joint kit	G031 Bearing element (E4, E4C)	G070 Valve element	G031 Front balancing cover (ABF)	G082 Sealguard kit	G034 Front cover	G090 Pump element (LPQ,ABF,ABQ,ALG)	G041 Rear bearing element	G098 Magnetic coupling	G050 Shaft seal	G099 Complete shaft coupling	G051 Sealing element	G102 Pump element (E4, D4)	G052 Mechanical seal	
G011 Rotor set, CCW-rotation	G053 Minor kit																						
G012 Rotor set, CW-rotation	G054 Major kit																						
G015 Rebuilding set, incl rotor set G012	G055 Joint kit (E4)																						
G020 Sleeve element	G057 Joint kit																						
G031 Bearing element (E4, E4C)	G070 Valve element																						
G031 Front balancing cover (ABF)	G082 Sealguard kit																						
G034 Front cover	G090 Pump element (LPQ,ABF,ABQ,ALG)																						
G041 Rear bearing element	G098 Magnetic coupling																						
G050 Shaft seal	G099 Complete shaft coupling																						
G051 Sealing element	G102 Pump element (E4, D4)																						
G052 Mechanical seal																							
Deviating designations:																							
Shaft couplings	Pump series/pump size(s)/generation(if deviating)/G099 (if space)/IEC size/no of pole LPQ 100-140 IEC 280																						
Shaft seals (some)	G050/Txxx (pump size) xxx xxx (shaft seal material code)G050 T045 US0 UUV																						
Minor/joint kits	Valid for two different material codes ACE 032N3 xT/xQ G053 (or G057)																						

On sectional drawings are the first character omitted. 'B'-components as B501 are on sectional drawings shown as 5010, B401 as 4010 etc. Spare part kits are not shown on the sectional drawings

Note 1: Designations for commercially available items, such as bearings, O-rings and washers, generally deviate from above.

Note 2: Components may be used in more than one pump series, and hence pump series code for a part may deviate from the pump it is used for.

Note 3: Part designed before 1987 may still have designations according to an earlier system.

Explanation of pump options A-number codes

Spare parts book
September 2016

Designation suffix:

Code New	Code Old	Explanation	Replaced by material code	Valid for current pumps	Valid for obsolete pumps
--	/V	Pumps with viton shaft seal (when nitrile shaft seal is standard)	xVxx		AAA
A020	/Y	Surface-treated cast iron pump bodies.		ACF, UCF, LPQ, ABQ	ACE, ACG, UCG ABF, ABQ
A050		Unpainted pump		ACE, ACF	
A056		Ball bearing option		D4	APD, D4C
A070		Hydraulic motor (CW-rotor set; CCW- rotation from the shaft end.)		D4	ALA, ALB, ALG APD, APG
A098		Minor change of pump made by IMO AB.*			
A099		Minor change of accessories mounting made by IMO AB.*			
A101	/101	Nonstandard rotation: CCW (counter clockwise) CW-rotation is standard)		ACE, ACG, UCG, ACF, UCF, E4, D4, D6	ALA, ALB, ALD, ALG, B4, D4C
A102	/102	Nonstandard rotation: CW (clockwise) (when CCW-rotation is standard)			AAA, AAD, AAE, ABB, ABF, ANA
A141		Pump with special flange (front cover) to replace ALA and B4 pumps.		E4	
A313	/U	GA-valve intended for HFO (Heavy fuel oil)-use valve item 647 is modified.		GAD, GAR, GAS	
A333		A125, with mechanical shaft seal		D4	
—	615A	Valve spring option (low pressure)	xxxO	ABQ 160-180 ACG	ACE x1/x2
—	615B	Valve spring option (high pressure)	xxxP	ACF	

Pumps with the old designation code are for example marked '/101' instead of 'A101'

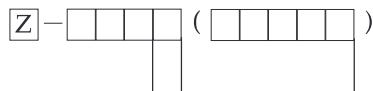

* Changes are against specific orders. That means that the A-number only indicates that the product has been changed not the type of the change itself. Changes made by us are filed on the sales order on which we delivered the pump. These pumps are also marked with our sales order number. Please always refer to this order number.

FOR OTHER A-CODE NUMBERS OR OTHER OLD DESIGNATION SUFFIXES - PLEASE CONTACT IMO AB BE AWARE OF THAT ANY PART(S) MAY DEVIATE FROM THE STANDARD VERSION.

PROTOTYPE PUMPS:

Prototype pumps and very special pumps, especially for the Navy, have a special designation.

Designation:

Various characters:

Numerical order _____
Generation figure A,B,C, _____

Basic pump series and size/lead _____

Example:
Z-432B (D4 052N 101)

Please contact Anne Quesney from Defense Department for all Navy products.

Email: Anne.Quesnay@colfaxfluidhandling.com.

Spare parts commitments could be none, or, as for Navy pumps, be longer than the normal 10 years.

Upgrading of old low pressure IMO pumps

Types ACD, ACE, ACG, ACF

Spare parts book
September 2016

Obsolete pump

Current pump

Steps to be taken

1) ACD pumps

ACD 25-2 N3F/ACD 25-2L N3F	ACD 025x6 NVBP
ACD 25-2 N4F/ACD 25-2L N4F	ACD 025x6 NVBP
ACD 25-2 N5F/ACD 25-2L N5F	ACD 025x6 NVBP
ACD 25-2 N6F/ACD 25-2L N6F	ACD 025x6 NVBP
ACD 025x6 IRBP	ACD 025x6 NVBP
ACD 025x6 IVBP	ACD 025x6 NVBP

5) ACG Generation 6*Notes:*

*For HFO Booster pumps we recommend our OptiLine pump unit ACG 045x8 NxBP. Pump/motor datas required to dimension magnetic coupling. UCG does not exist as OptiLine pump.

Notes:

*) Shaft seals 50G or mechanical seals 52G are still manufactured but can be withdrawn from manufacture without further notice. See page 107, Note 1.

Available seals are noted at Section D.

**) Wear spare parts sets as G050, G053, G057 will still be available.

1) Stated generation figure is the last generation figure. Stated forms are the standard forms.
Optional forms have normally additional letters behind the standard form.

Pump body and sleeve

- I Cast iron
S Cast steel
F Welded steel
N Nodular cast iron
L Aluminium

Rotation of rotor set

- CW clockwise rotation
CCW counter clockwise rotation

Mounting form

- F Foot (bedplate) mounting
B Bellhouse (flange) mounting
T Vertical tank mounted
(with our without suction pipe)
M Submerged pump
J Axial inlet
C Pump without inlet chamber

Connections

- BSP BSP-threaded connection
FL Flange connections

615	Valve spring	1					x	x	x	

Notes:

- 1) Delivered only as Rotor set G012.
When ordering spare parts, please state the complete pump identification according to its name plate and required spare part set or the required parts position number.
- 2) The spare part set includes both O-ring and gasket. The o-ring is to be used in the L6/N6 version with o-ring. The gasket is to be used in the version with gasket. *Never fit both o-ring and gasket in one pump!*
Change from gasket to o-ring was done in early 1996.
- 3) Shaft seal p/n 015701, for obsolete pumps N3F, N4F & N5F is obsolete.
N3F, N4F & N5F: Please order a new pump x6 NxBP which has same technical data and measurement.

Recommendation:

For maintenance the following spare part sets are recommended:

Set: To be used:

G057 Joint kit

For dismantling of the pump.

G053 Minor kit

For service

Major kit = pump

For repair after damage or greater wear.

Ordering example:

For IMO-pump ACD 025L6 IVBP
serial number 456789:

Shaft seal pos G050 p/n 192691

Valve spring pos 615 p/n 018523

Notes:

- 1) Also valid for obsolete pumps N3F, N4F & N5F.
- 2) Also valid for obsolete pump N4F & N5F.
- 3) Also valid for obsolete pump N5F.
- 4) Also used for old pumps xRxx if viton is acceptable.

List of components

Valid for all ACE pumps, size 025/032/038. Rotor lead and Generation: D3/K3/L3/N3

With version codes: N} Q} B} P}
T}
V}

Also valid for pump options: A050, A078, A101, A291

The version code is composed of the letters in the 4 columns.

Example of pump designations std: ACE 025L3 NTBP;

option: ACE 038N3 NVBP A101

Recommended Spare Parts Kits and tool kits

Every shutdown for service of a plant is costly. The time for repair should therefore be limited to a minimum which can be accomplished by keeping a spare pump. The changed pump can later be repaired at a suitable place and can then be used as a spare pump. For maintenance the following spare parts kits and tools are recommended:

Kit:	Content:	To be used for:
G057	Gaskets & o-rings	Dismantling of pump
G012	Rotor set	Repair after break down
122	Ball bearing	Repair after break down

ACF/UCF (K5/L5/N5) Low pressure pump

Notes:

- 1) Excluded in xxxG
- 2) Excluded in xxxE
- 3) Valid for xxxE
- 4) Valid for pump option A327 & A385, size 70 only
- 5) Included in item 1020 or 1010
- 6) Included in item 5010
- 7) Only sold as G070
- 8) Removed in all pumps - does not need to be replaced

Explanations:

ACG: Pump with DIN flanges

UCG: Pump with ANSI flanges

A101: Nonstandard rotation: CCW (counter clockwise)
(CW-rotation is standard)

A327: Pump with Tuning, size 70 only

A385: Combination of A101+A327, size 70 only

G011: Rotor set CCW-rotation option

G012: Rotor set CW-rotation (std)

G050: Shaft seal

G053: Minor kit

G054: Major kit consisting of: G053+G012 (G011)

G057: Joint kit

G070: Valve element

ACG K7/N-pumps as replacement pumps

for old N2/N3/N4-pumps when it is essential to receive identical outer dimensions:

Valid only if the pump assembly is equipped with our aluminum connecting frame with angle bracket and our std shaft coupling type E.

As per our dimension print ACG 0452 (ACG N3x). Besides the K7/N7-pump you shall order.

	045	052	060	070
Set of intermediate plates.				
IEC 80-90, F.size F165	176412	176412	--	--

Recommended Spare Parts Kits and tool kits

Every shutdown for service of a plant is costly. The time for repair should therefore be limited to a minimum which can be accomplished by keeping a spare pump. The changed pump can later be repaired at a suitable place and can then be used as a spare pump. For maintenance the following spare parts kits and tools are recommended:

Kit	Contents	To be used for
G057	Gaskets, o-rings etc.	Dismantling of the pump
G012	Rotorset	Repair after major breakdown or great wear
122	Ball bearing	Repair after major breakdown or great wear
193128	Guide pins pump size 045	For dismantling and assembly of the pump
193129	Guide pins pump size 052	For dismantling and assembly of the pump
193130	Guide pins pump size 060	For dismantling and assembly of the pump
193131	Guide pins	For dismantling and as-

Notes:

- 1) These rotor sets are not valid for pump options A056/G056 & A070/G070. For rotor sets for these pumps, please contact IMO. Refer also to IMO for CCW-rotor sets.
- 2) Also valid for obsolete pumps in forms N1/L1/K1.
- 3) Used for pumps D4 (F/T/V) x1 in sizes 025-052
- 4) Used for pumps D4 (F/T/V) x1 in sizes 060-070 , D4(F/T/V) x1 A072 in sizes 025-052, D4B x1 in all sizes
- 5) Used for pumps D4 (F/T/V) x1 A051 in all sizes, D4B x1 A060 in all sizes
- 6) Used for pumps D4 x1 A073 in all sizes
- 7) xx IVBE for sizes 052-070 xx IVBP for sizes 052-070
- 8) O-ring for obsolete D4 pumps with internal return. Replacement pumps with internal return have the designation A354. Please contact IMO.
- 9) For pumps xTBP A329, A396 are the standard xTxx shaft seals used.

Recommendation:

Set: To be used:

G057 Joint kit

For dismantling of the pump.

G053 Minor kit

For normal scheduled inspection.

G102 (CW) or G101 (CCW) Pump element

For repair after damage or greater wear.

Ordering example:

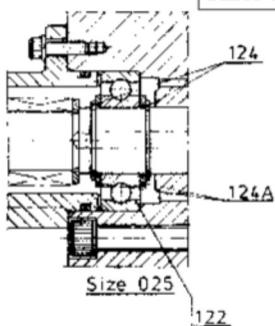

For IMO pump D4 025N2 LVBE
serial no 456789:

Rotor set G012: Part no. 163410
Shaft seal G050: Part no. 143859

Pump(element)s in version 1 are obsolete. Deviating parts are the front cover item 501, rotorset G012 and in some cases also the shaft seal G050. For economical reasons, please order a new pump element in version 2 as replacement for old version 1 pumps. Please contact us if you have problems to identify which pump element you require.

Recommendations

Set: To be used:

G057 Joint kit

For dismantling of the pump.

G053 Minor kit

For normal scheduled inspection.

G054 Major kit, or pump element G102 (CW)

For repair after damage or greater wear.

Ordering Example:

For IMO-pump D6 038N3

STBZ

serial no: 234567

Rotor set G012

Part no 162958

Shaft seal G050

Part no 172726

Notes:

1) Not valid for A309

List of components

Valid for all E4 pumps, size 025/032/038/045/052/060/070. Rotor lead and Generation: K1/L1/N1/K4/L4/N4

With version codes: L } E } B } E } The version code is composed of the letters in the 4 columns
 Y } R } J } V } T }

Also valid for pump options A101, A141, A291, A337, A406

Example of pump designations std: E4 025L1 LRBE

option: E4052N4 YVJE A141

E4 pumps consist of:

a pump element Gxxx + a inlet chamber G065 xx.

Notes:

- CCW-rotation version pos no 101, 201
- Valid for xxTE sizes 045
- Valid for xxBE: 2 pieces and xxJE 4 pieces
- Valid for xxBE
- Valid for xxJE sizes 052-070
- Valid for xxJE sizes 025-045: 2 pieces and sizes 052-060: 1 piece.
- Valid for xxJE and xxBE
- Valid for xxTE and xxJE
- Excluded in pump option A406

Old/Current designations:

E4F 025N1	E4 025N1 LEBE
E4T 032L1	E4 032L1 LETE
E4V 038N1	E4 038N1 LEJE
E4F 045K1 A149	E4 045K1 YEBE
incl conn.frame	xRxx

Note: The radial seal is included in the conn.frame/front cover and not in the pump itself.
 Therefore the pump element has the designation "E" in material code xExx.

Explanations:

- Pump accessories
- A101: Nonstandard rotation: CCW (counterclockwise) CW-rotation is standard)
- A141: Pump with special flange (front cover) to replace ALA and B4 pumps.
- A291: Pump with tapered power rotor. Reduced flow
- A337: Combination of A101 + A141
- A406: Pump without xxJx-strainer

E4 Medium pressure pump

Recommended Spare Parts Kits and tool kits

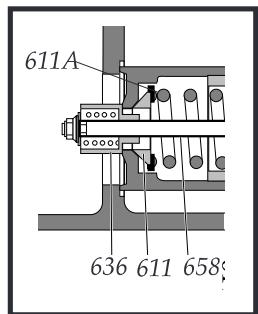

Every shutdown for service of a plant is costly. The time for repair should therefore be limited to a minimum which can be accomplished by keeping a spare pump. The changed pump can later be repaired at a suitable place and can then be used as a spare pump. For maintenance the following spare parts kits and tools are recommended:

Kit:	Content:	To be used for:
G057	Gaskets & o-rings	Dismantling of pump
G012	Rotor set	Repair after break down
122	Ball bearing	Repair after break down

Notes:

- 1) Accessories (SAE counter flange) for GAS valves
- 2) Included in valves GAR 100 and 112, GAS 025 and 040
- 3) See assembly drawing on page 65
- 4) Valid for all GAR and GAS versions

Old designations Current designations:
GAX...../U GAX xxx01 Txxx A313

Obsolete valves:
GAD S6A (valve with hand wheel)
GAD S6B (valve with cap)

Cross reference list:

Old obsolete GAD valve	Todays corre- sponding valve
GAD 1/2" S6A/S6B	GAR 012
GAD 3/4"	GAR 034
GAD 1"	GAR 100
GAD 1 1/2"	GAR 112
GAD 25	GAS 025
GAD 40	GAS 040
GAD 60	GAD 065

Please keep in mind that the GAR/GAS valves have deviating outer dimension compared with the old GAD valves.

Valve spring option:

Old designation	New designation
615W	T008 (range 2-8 bar)
615A	T040 (range 6-40 bar)
(blank)	T075 (range 15-75 bar)
615C	T100 (range 30-100 bar)

Obsolete products

Spare parts book
September 2016

Please note, when selling an obsolete pump you also have to inform your customer until which year spares will be available. The normal 10 years spare parts obligation is only valid for current products.

Spare parts for the below mentioned pump series and sizes are not longer available as they are withdrawn from production with the exception for parts of type A, B and C

AAD/AAE sizes 025-038
AAG/AAH sizes 045-070
ALA sizes 025-052
ALD sizes 025-052
ALG sizes 060-070
ANA sizes 015-020
AND/ANG/ANL sizes 025-070
APD sizes 025-052
APG sizes 060-110
B4 sizes 025-070
E4C - " -
E4S - " -

- A Mechanical shaft seals as noted in SHAFT SEALS FOR WITHDRAWN PUMPS in this section
- B Standard components such as O-rings and ball bearings will be available in many cases. Please contact IMO AB
- C IMO unique components that are also included in current pump series, for example valve components

List of components

Valid for all pumps in sizes: AAA 015/020; Rotor diameter and generation N1 (015) & N2 (020)

With version codes: I } R } B } E } The version code is composed of the letters in the 4 columns
V }

Also valid for pump option A102

Example of pump designations std: AAA 015N1 IRBE

option: AAA 020N2 IVBE A102

Notes: 1) Included in item 401

Older versions

AAA 15-3 NA: (foot-mounted version)

All parts excl. front cover item 501 are applicable.

AAA 20-3 NA: (foot-mounted version)

All parts excl. pump body item 401, front cover item 501 are applicable.

G050 has to be completed with item 515.

AAA 20-3 NE/N2E:

When ordering new shaft seal the gland nut item 515 has to be ordered.

UAA IRBE (pump with NPT-thread connection)

All parts excl. pump body item 401 are applicable.

Explanations:

A102: Nonstandard rotation: CW (clockwise) (as CCW-rotation is standard)

G011: Rotor set CCW rotation (Standard)

G012: Rotor set CW rotation (Option)

G050: Shaft seal

G053: Minor kit, consisting of G050 + G057

G054: Major kit, consisting of G050, G057 + G011(G012)

G057: Joint kit; size 015 - item 556, size 020 - item 506 and 556

ABF 140P4 IRYP A561

Sizes 80-100 in generation N2M=z2

Sizes 110-140 in generation N4M=z4

Also valid for older generations of pumps:

ABF 110-140 N2M:

All parts, except item 401 pump body, are applicable.

ABF NM, NM 401 or NM 410 (all sizes)

All parts, except item 401, 501, 601, 606 and 622A pump body, are applicable.

These pumps have welded pump bodies.

ABB N3B(Y) (all sizes): Foot mounted version

All parts included in pump element G090 and valve element G070 are identical with ABF parts.

** Spares of ABF pumps in sizes 080-140 were available until 2003. After that date only the spare parts sets G050 & G057 will be available for sale at least up to the end of 2017.

Ordering code

Pos No	Spare parts (set)	Part numbers for pump size						Note

Notes:

- *) For pump ABB 90-3 N3B: Shaft seal G050 p/n 116251;
- 1) Not valid for pump option A020.

Recommendation:

For maintenance the following spare part sets are recommended:

Set: To be used:**G057 Joint kit**

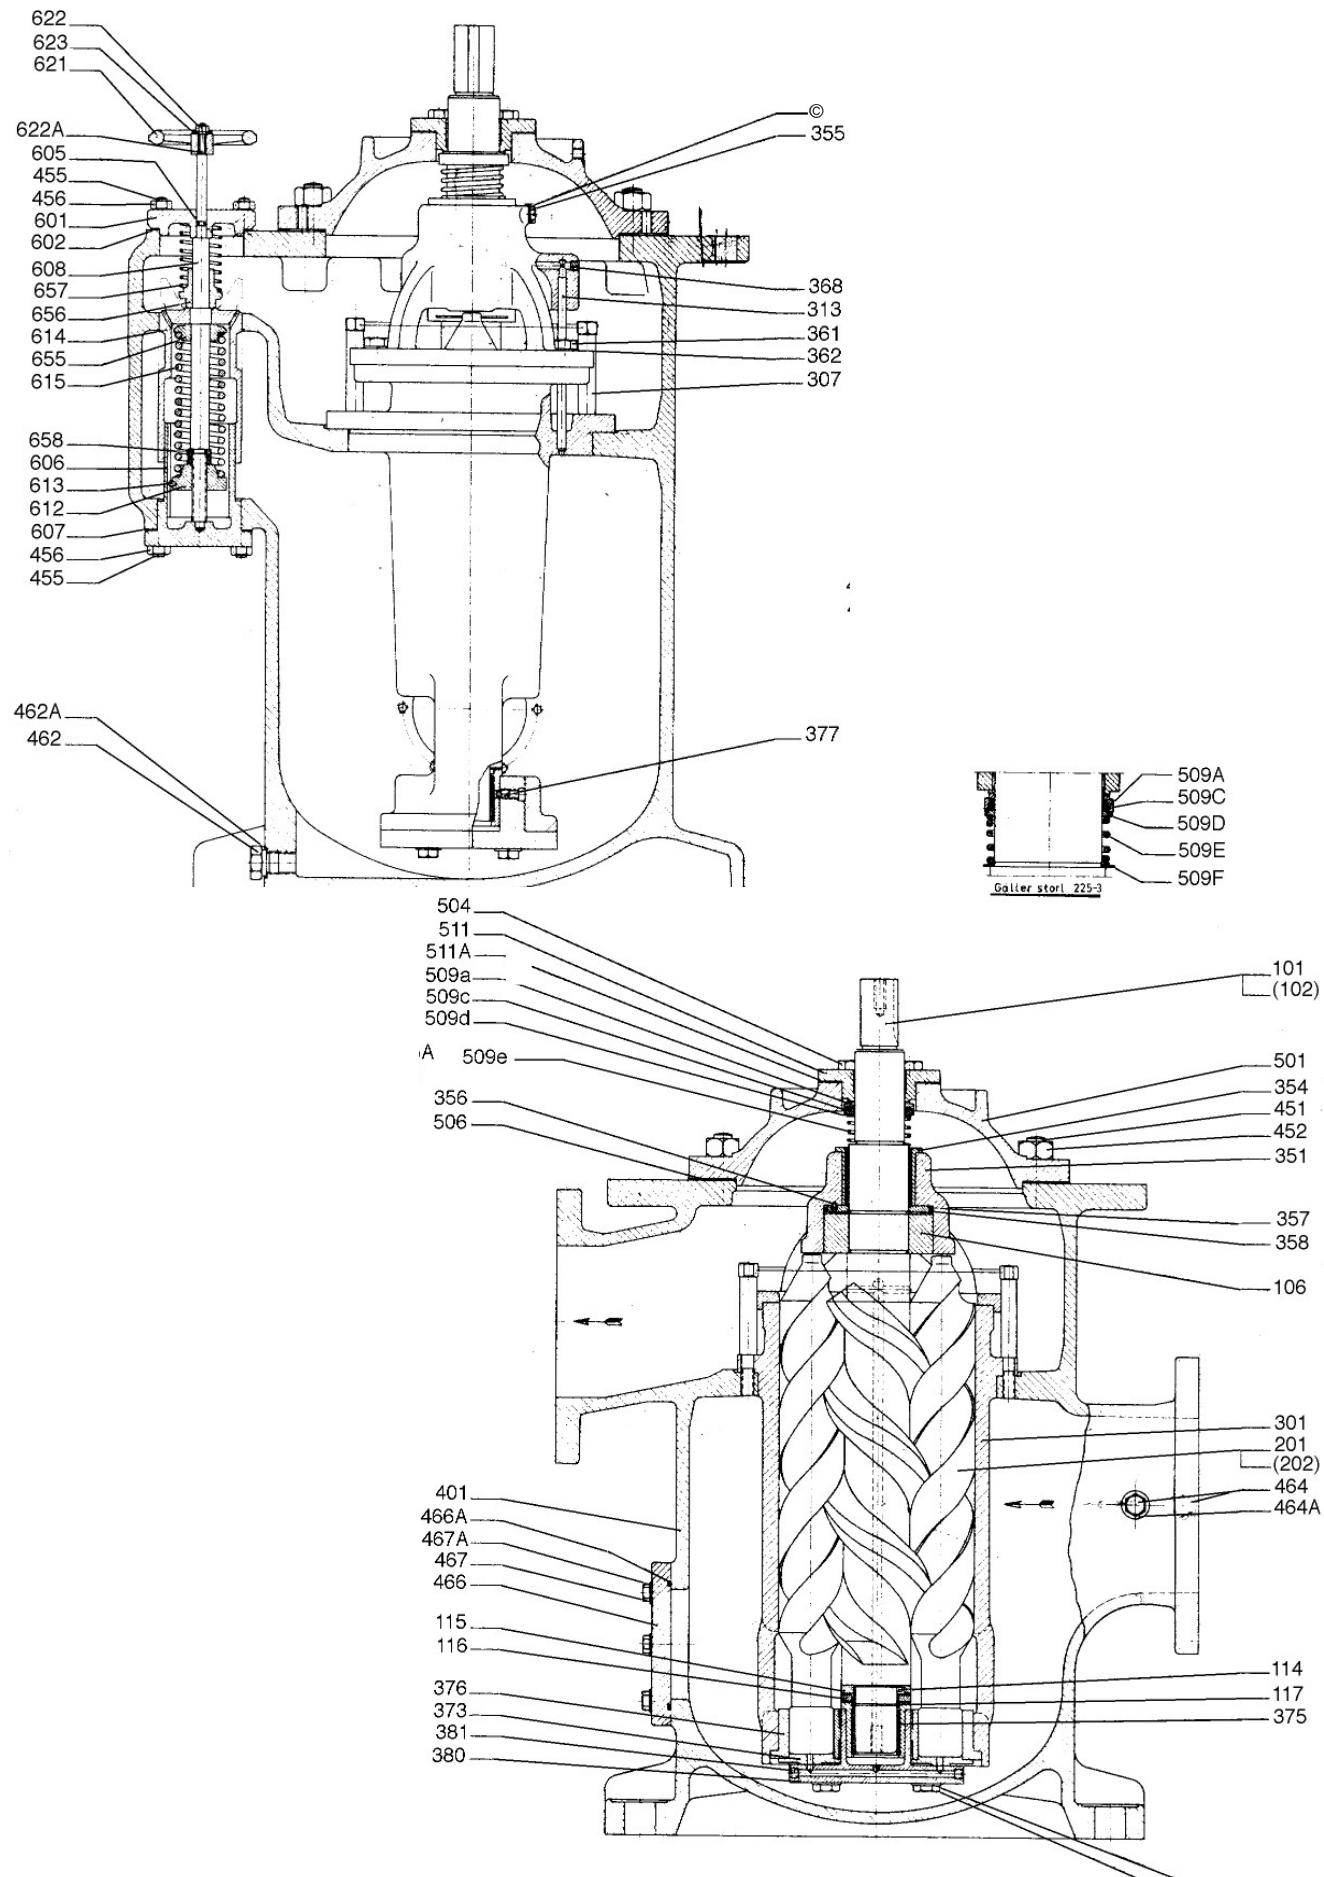

For dismantling of the pump.

G053 Minor kit

For service

Ordering example:

For IMO-pump ABF 080N2 IRYP
 Serial number 345678
 Shaft seal G050 p/n 116251

List of components

Valid for all pumps in sizes: ABQ 100, 110, 125 & 140; Rotor diameter and generation L5/N5/P5

With version codes: I } R } Y } P } The version code is composed of the letters in the 4 columns

Also valid for pump option A020 & A561

Example of pump designations std: ABQ 100N5 IRYP

option: ABQ 140P5 IRYP A561

Notes:

- 1) Delivered as complete rotor set only.
CW=clockwise rotation;
CCW=counter clockwise rotation.
- 2) Pumps with CCW-rotation have the additional pump designation 'A101'.
- 3) Included in version code xxxP/xxxO.
- 4) Available in two alternatives:
for max 16 bar - version code xxxP,
for max 6 bar - version code xxxO.
- 5) Included in version code Nxxx.
- 6) Included in version code xxxE.
- 7) New spare part set G057 excluding ball bearing introduced. Old set available during a transition period. Part numbers, see ordering code.

ACE (K1/K2/L1/L2/N1/N2) Low pressure pump

Obsolete product - Current ACE (K3/L3/N3) See section C

Spare parts book
September 2016

Spares available up to end of 2017.

Recommendation:

For maintenance the following spare part sets are recommended:

Set: To be used:

G057 Joint kit

For dismantling of the pump

G053 Minor kit

For service

G054 Major kit

For repair after damage or greater wear.

Ordering example:

For IMO-pump ACE 032N2 NTBP,
serial number 456760:

Shaft seal pos G050 p/n 190811

Valve spring pos 615 p/n 154054

Old designation:	Replaced by gen 1:	Replaced by gen 2:	Current designation:
ACE 25-2 NC	ACE 025N1 IRBP	ACE 025N2 NVBP	ACE 025N3 NVBP

	ACE 032N2 NTBP A368		contact IMO ACE 032N3 NTBP

Pumps for HFO application should be replaced by our ACE OptiLine, magnetic coupled pump. Pump duty required for correct selection.

Replacing ACE pumps generation 1 and 2 by current pump in generation 3

Existing Pump Unit Pump Model	Existing Motor IEC size	Frame	Replace bare shaft pump by model	Replace complete shaft coupling Part No
ACE 025L1/N1 or L2/N2	71	130	ACE 025L3/N3	191603
	80	165		191604
	90	165		191605
	100/112	215		192175
ACE 032L1/N1 or L2/N2	71	130	ACE 032L3/N3	191603
	80	165		191604
	90	165		191605
	100/112	215		192175
ACE 038K1/N1 or K2/N2	80	165	ACE 038K3/N3	191640
	90	165		191641
	100/112	215		191741
	132	265		191742

The existing shaft coupling for pump size 025 can be used also after the changing the pump into generation 3. The designations of the shaft couplings may refer to other pump series as the same coupling is used to several pump series.

Recommendation:

For maintenance the following spare part sets are recommended:

Set: To be used:

G054 Major kit

For repair after damage or greater wear.

G057 Joint kit

For dismantling the pump.

Ordering example:

For IMO-pump ACE 032N3 NKBP, serial number 456789:

Ball bearing pos 122 p/n 173765

Valve element pos G070 p/n 189873

Guide pins, Tool H, recommended for dismantling and assembling

Spares available up to end of 2018.
List of components

Valid for all ACF/UCF Generation 4 pumps with lead and sizes: 080/090/100 K4/N4; 110/125 L4/N4

with version codes: I } R } B } E } Also valid for pump options A020, A084, A087, A101.

N } V } F } O } The version code is composed of the letters in the 4 columns

656	Sleeve	1							x	x	5
657	Spring	1							x	x	5
658	Distance sleeve	1							x	x	5

Explanations:

ACF: Pump with DIN flanges

UCF: Pump with ANSI flanges

A020: Surface-treated cast iron pump bodies.

A050: Unpainted pump

A084: Pump with lifetime ballbearing

A087: Combination of A101 + A084

A101: Nonstandard rotation: CCW (counter clockwise) CW-rotation is standard)

G011: Rotor set CCW-rot.

G012: Rotor set CW-rot.

G050: Complete shaft seal

G053: Minor kit

G054: Major kit

G057: Joint kit

G070: Valve element

Old designation Current designation

ACF 80-3 N4F	ACF 080N4 IRBO
ACF 90-3 N4F 615B	ACF 090N4 IRBP
ACF 100-3 N4F A051	ACF 100N4 IVBO
ACF 110-3L N4F/Y	ACF 110L4 IRBO A020
ACF 125-3L N4F A101	ACF 125L4 IRBO A101

Obsolete pumps**N2F & N2F/60: (ACF only)**

N2F & N2F/60 pump has different Shaft Seal, p/n for this seal can be found in the obsolete section: Shaft Seals for withdrawn pumps.

N3F: (ACF only)

Most parts are also valid for N3F-pumps. Should you however need new pump body item 401 - please order new ACF Gen. 5 pump.

Notes:

- 1) Valid for sizes 100 - 125
- 2) Delivered only as shaft seal G050
- 3) Valid for pump xxxE, item no 601 - 658, 480 excluded
- 4) Number of shock valves: size 080-090 :0
100-110: 1, 125: 2
- 5) Valid for pump xxxO/xxxP
- 6) On some older drawings is one pce noted as 602 and the other as 607.
- 7) Excluded in A084 & A087, replaced by a plugg.
- 8) New spare part set G057 excluding ball bearing, washer and nut introduced. Old set available during a transfer.

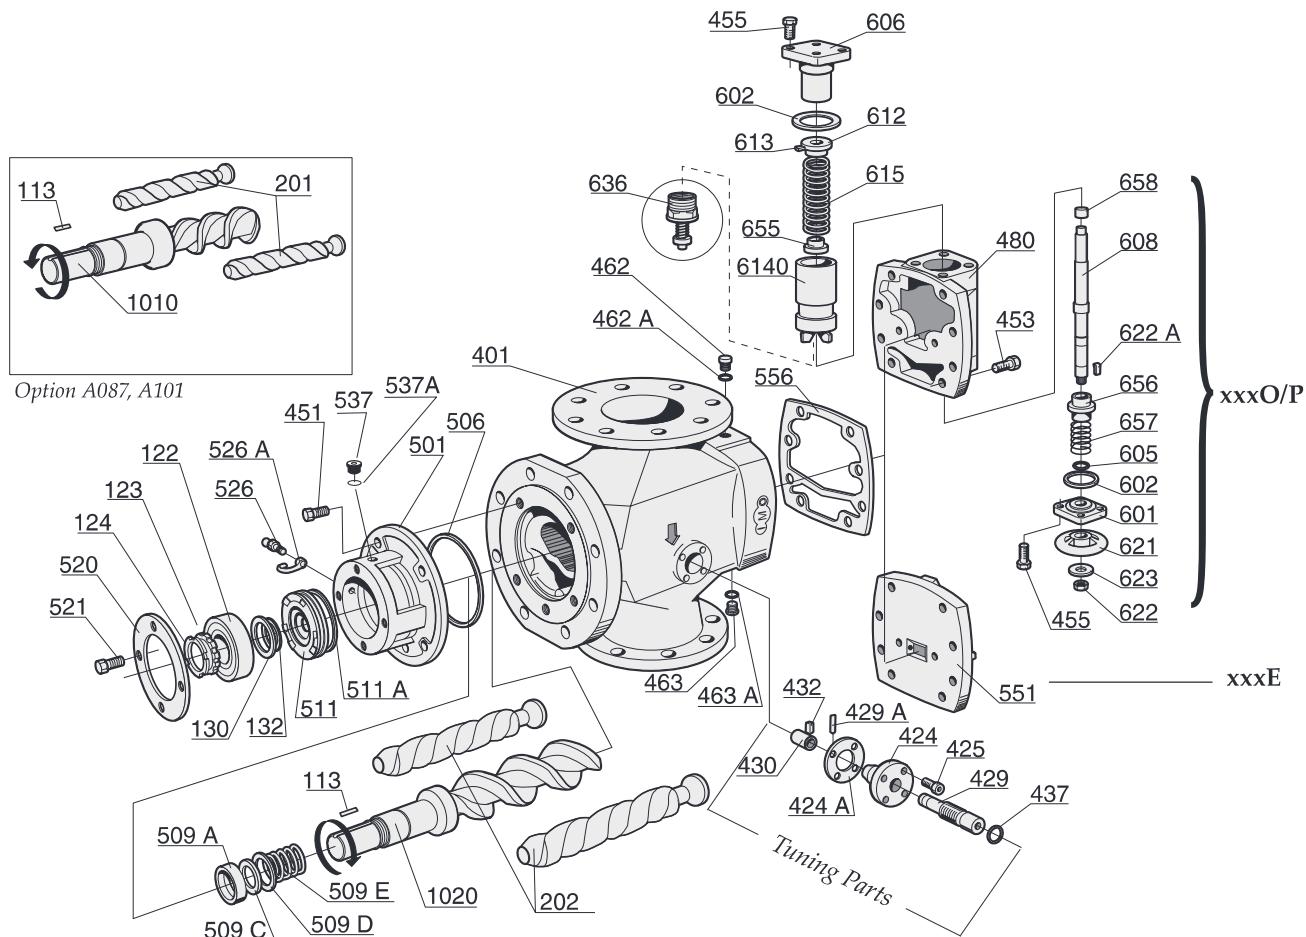

Spares available up to end of 2018.

Recommendation

For maintenance the following spare parts kits are recommended:

Set **To be used:**

G057 **Joint kit**

For dismantling of the pump

G053 **Minor kit**

For service

G054 **Major kit**

For repair after damage or greater wear

Ordering example:

For IMO-pump ACF 080N4 IRBO

serial number 456789:

Minor kit G053, p/n 078576

Notes:

- 1) Also valid for pump N2F & N2F/60
- 2) Also valid for pump N3F but above tuning parts must be ordered. The pump will then, with the change of pump body, be upgraded to form N4.
- 4) Not valid for A084 and A087.
- 5) Valid for A087 & A101
- 6) Valid for A084 & A087
- 7) Production is discontinued, components may still be available in stock, please contact IMO AB.
- 8) Size 125: Pumps in generation N4 delivered during 1985-summer 1986 have the old N3 (smaller) o-ring, p/n nitrile 016519 / viton 152868 (size 209,3x5,7)

All N4-pumps delivered since summer 1986 are equipped with the current bigger o-ring.

Spares available up to end of 2017
List of components

Valid for all pumps in sizes: ACG 045/052/060/070. Rotor diameter & Generation N2/N3/N4

With version code: I } V } B } E } Also valid for pump options: A101
 N } F } G } The version code is composed of the letters in the 4 columns.
 Y } O } P } Example of pump designations
 ACG 045N3 IVBP; option 052N4 NVBO A101

Explanations:

65G: Inlet chamber
 11G: Rotor set (CCW-rot, non std)
 12G: Rotor set (CW-rot, std)
 20G: Sleeve element
 50G: Shaft seal
 90G: Pump element

Valid for pumps:

ALB xx-4 NM (normal lead)
 xx-4B NM (low lead)
 xx-4H NM (high lead)

Pumps incl inlet chamber:

NMH (radial inlet)

NMS (axial inlet)

Valid for pump options:

N (submerged ver. excl shaft seal)
 NM/101
 NM/101/52
 NM/101/341/52
 NM/101/401A/52
 NM/101/401B/52
 NM/401A/52
 NM/52

101: CCW-rotation

52: Cast iron parts unpainted and all O-rings in Viton

341: Pump with special pump casing and special flange

401A: Pump with special pump casing

401B: Pump with special pump casing

* ALB pumps and their spares are obsolete. Shaft seals and those parts which are identical to those in the corresponding ALG pump are still available, please contact IMO.

Notes:

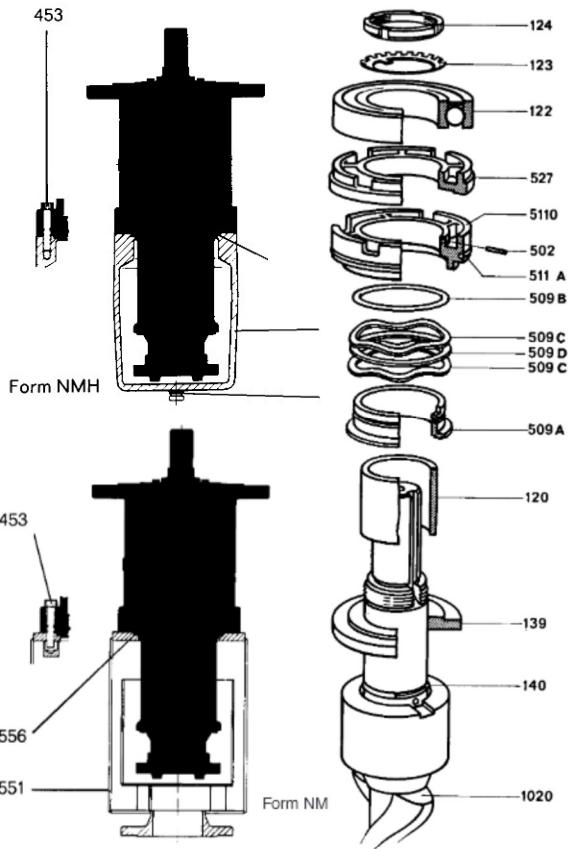

- 1) Included in form N only.
- 2) Included in form NM only.
- 3) Included in option NM 101/341/52 only.
- 4) Included in option NM 101/401A/52 only. Also valid for form NM 101/401B/52 except item 460 which is

5) Included in the SAE counter flange (outlet).

6) The mounting mandrel is delivered together with all

- 1) From 1987 new pumps are equipped with an O-ring between the pump and inlet chamber. This change was made to avoid leakage. This change was made without changing the pump designation. As spare part to old pumps the old gasket must be used.

Assembly drawing

List of components

 Valid for all pumps in sizes D4C 025,032,038,045,052,060 & 070; Rotor diameter and generation L1/K1/N1 & L2/K2/
 N2

Explanations:

A056: Ball bearing option (cpl. pump)

A101: CCW-rotation pump (cpl. pump)

A246: Combination of A056 + A101 (cpl. pump)

G011: Rotor set, CCW-rotation (option)

G012: Rotor set CW-rotation (std)

G050: Shaft seal

G053: Minor kit consisting of G050+G057

G054 = Major kit = compl. Cartridge pump

G056: Ball bearing option (cartridge)

G057 = Joint kit

G101: CCW-rotation pump (cartridge)

G246: Combination of G056 and G101 (cartridge)

Pumps with the designation "UD4" and with any of above material combinations, are identical with the corresponding D4C-pump cartridge.

Old designation Current designation
Cartridge pumps:

D4C 025N2	D4C 025N2 LRCE
D4C 032L2 A073	D4C 032L2 LTCE
D4C 038N2 A056	D4C 038N2 LRCE G056
D4C 045K2 A051	D4C 045K2 LVCE

Complete pumps

D4H 052N2	D4C 052N2 SxFE*
D4R 060K2	D4C 060K2 SxBE*
D4U 070N2	D4C 070N2 SxJE*

* Normally are these pumps equipped with

Generation N1/L1/K1 cartridge pumps

Cartridge pumps in version 1 are obsolete.

Deviating parts were the front cover item 501 and rotor set

D4C Cartridge High pressure pump

Obsolete product - production of spares withdrawn
